

Nexus Specs

Nexus is built primarily using the following:

PHP - A server side scripting language

- PHP is a popular general-purpose scripting language that is especially suited to web development.
- Fast, flexible and pragmatic, PHP powers everything from your blog to the most popular websites in the world.
- 8 out of every 10 websites that you visit on the internet are using PHP in some way.
- WordPress, Wikipedia, Facebook

MySQL - an open-source relational database management system

- Developed by Oracle.
- Used across the web including AirBnB, Uber and Netflix.

C# to develop the PC-based MP Connect link

Visit the following link to compare usage on the most popular websites
